## Call for applications – Master’s Program Medical Neurosciences

Dear Colleague,

Our *International Graduate Program Medical Neurosciences* at Charité –Universitätmedizin Berlin is an interdisciplinary graduate program.

We are now recruiting students for our 2025 intake  
**The application deadline is 15 January 2025**

Focusing on bench-to-bedside translation, we accept students with backgrounds in natural sciences, medicine, or psychology. Medical Neurosciences offers easy access to top-tier research institutions and clinical research for young scientists in one of Europe’s most renowned university hospitals.

The program is an excellent opportunity for Bachelor graduates of the natural and life sciences interested in a research career. The master’s program is entirely taught in English, and fully compatible with the Bologna criteria.

We are looking forward to many interesting applications!

Therefore, we would be grateful if you recommended/forwarded the announcement to interested students or colleagues and **post the enclosed posters at prominent places within your institution and make the postcards available where appropriate!**

We thank you in advance for your support. Of course, we would be delighted to return this favor at some point.

Sincerely,

Prof. Dr. Helmut Kettenmann  
– Chair –  
Admission and Examination Board
